EXPERIENCE [[Link](#)]

UI/UX Designer

Mar '26 – Aug '26

INVT.RSVP - Hi-fi Cincy LLC

Cincinnati, OH

- Led end-to-end product design in Figma for a **0→1 SaaS platform for event organizers**, shipping **40+ UI screens**, refining User Experience (UX) with responsive design across web and iOS mobile app for diverse user profiles.
- Crafted a unique **brand identity**, scalable **design system**, and **component libraries**, building high-fidelity design and **interactive prototypes** with Figma MCP and Claude Code for design-to-code handoff across a cross-functional team.
- Redesigned existing **user flows** and UI screens for homepage, profile page, event creation, event page, and map to improve event discovery, navigation, and clarity.
- Designed monetization and discovery features: ticketing, custom offers, payment flows, analytics dashboards, and an event-crawl that surfaces venues by type and dwell time to drive organic discovery.

UX Researcher

May '25 – Aug '25

The Livewell Collaborative

Cincinnati, OH

- Led user research across 17 pediatric hospital units to **solve patient misidentification** safety risks, executing 72 hours of ethnographic field observation, contextual inquiry, and clinician, patient, and family interviews.
- Synthesized qualitative findings via **affinity mapping**, **journey mapping**, and **root-cause analysis** into a research report and design requirements, securing cross-functional stakeholder approval to advance a hospital-wide ID band redesign
- Conducted employee interviews, donor surveys, and **12+ contextual observations** to map spatial pain points and address donor disengagement and poor wayfinding in the Hoxworth Blood Center atrium.
- Delivered personas, journey maps, moodboards, and **3 spatial concepts** which we then collected user feedback from the management for a full atrium redesign serving donors and staff across a regional blood center.

PROJECT [[Link](#)]

Greenera — Conscious-Shopping Mobile App | UI/UX Design [[Link](#)]

- Developed a Mobile App Design for consumer products that rethinks the e-commerce experience to inform conscious purchase decisions based on product lifecycle, using Figma and Claude for iterative high-fidelity prototypes.
- Designed a feature that scans a consumer product label and packaging to flag components harmful to the environment and human health, using AI to source literature and build evidence with supporting citations.

The Family Table — Meal Planning Experience | UI/UX Design [[Link](#)]

- Redesigned the weekly meal-planning journey to increase family participation by turning five meal stages; decide, shop, cook, serve, & reflect; into shared roles using journey mapping & user-centered design
- Designed & prototyped four integrated touchpoints in Figma; recipe selection, shared grocery lists, Cook Mode, & post-meal reflection; to transform meal planning from a parent-owned task into a collaborative family experience

SKILL

Design: UX/UI Design, User-Centered Design, Micro-Interaction, Visual Design, Information Architecture, Design System, Component Libraries, digital products, Illustration, Data-Driven Design, Digital Strategy, Typography, A/B testing

Research: Customer journey, UX Research, Wireframes, Mockups, Rapid Prototyping, Storyboarding, Interaction Patterns, Design Documentation, Consumer Research, Usability Testing, Quantitative Research, Agile workflows, Market Analysis, FigJam

Technical: HTML, CSS, JavaScript, Front-End Development, React, TypeScript, TailwindCSS, GSAP animation, WCAG, Design Handoff, API, Prompt Engineering, Figma, Framer, Miro, Maze, Jira, Webflow, Photoshop, Illustrator Adobe Creative Suite

EDUCATION

University of Cincinnati

May '26

Master of Design, Human-Centered Technology Design (HCI) (GPA: 3.80 / 4)

Cincinnati, OH

Gujarat Technological University

Jun '23

Bachelor of Engineering, Computer Engineering (GPA: 3.7 / 4)

Ahmedabad, India
